

## How to join and view Zoom on a laptop or computer

1. You can join the meeting one of two ways
  - a) Click on the link on the email
  - b) Input the meeting ID and password from the Zoom home page
2. When you join the second way, you will see the screen below.
3. Input the meeting ID (which is a series of numbers on your email)

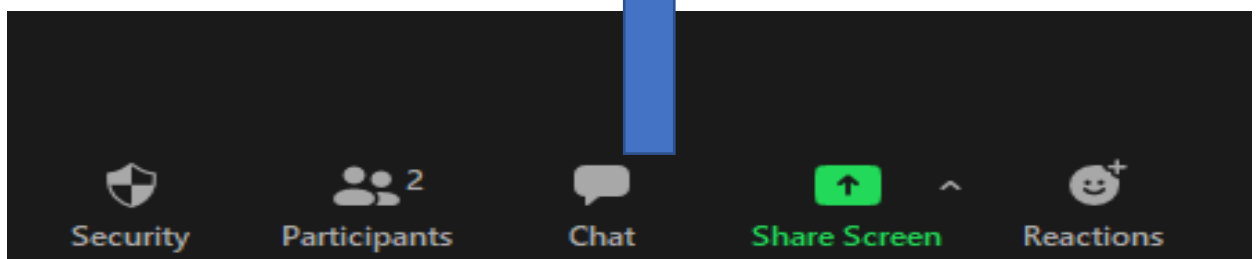

You will then be asked to connect your computer audio

This is what your screen should look like when you have joined the meeting.

You need to connect your audio and video so we can hear and see you.

The chat function is good for writing questions in so you don't interrupt the tutor
